

# Click-to-Sign Feature

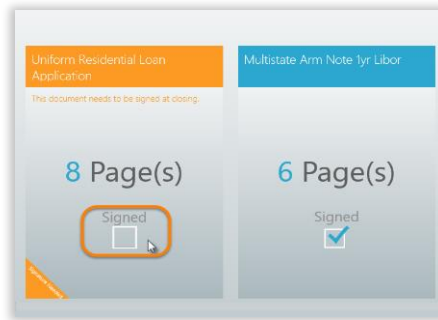

For those documents that did **not** batch sign, (Borrower(s) did **not** accept during the Review and Accept process), the Borrower(s) can now click on the signature/initials tag and apply the signature/initials that was already captured at the beginning of the closing.

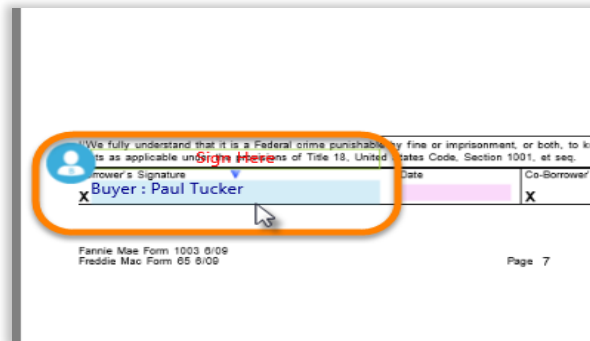

*Note: Signing Table will still allow you to click on the "Sign" button and have the Borrower re-sign, but it is not necessary anymore due to this feature.*

## Applying the Signature and/or Initials

1. During closing and in the Buyer access, click on the document that has not been signed.

2. Borrower will click on his or her tag.

3. In the pop-up, the Borrower will confirm the signature/initials by clicking on "Insert Signature and Date."
